LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

In the first half of this year, the Company recorded total revenue of approximately US\$1.843 billion, representing a historical high with a year-on-year growth of 26.3%, gross profit margin of 26.2% with a year-on-year growth of 7.4 percentage points, net profit attributable to the parent company of approximately US\$202 million, also representing a historical high with a year-on-year growth of 5.6 times, and earnings before interest, tax, depreciation and amortization of US\$766 million, representing a year-on-year growth of 45.1%.

This year marks the 20th anniversary of the establishment of the Company. On July 16, shares of the Company were successfully listed on the Sci-Tech innovation Board, signifying a new start in our journey of development. The proceeds from the offering amounted to approximately RMB52.5 billion and will be used mainly for our technology and innovation, which will help the Company further enhance its technological capability, enrich its product portfolio, expand its production capacity scale, and enhance the Company's overall IC foundry capabilities for various technology nodes and process platforms.

Our advanced process technology research and development and business operations have progressed seamlessly. Mass production for our first-generation of advanced technology has been smooth, and new tape out projects continue to be carried out with domestic and global customers. Steady progress has been made for the second-generation of our advanced technology platform; this advanced process technology is now in customer product qualification stage. With regard to mature processes, the capacity continues to be fully loaded, and the demand for applications such as CMOS image sensors, power ICs, fingerprint sensors, and specialty memory has been strong.

This year, the global macro economy still faces many uncertainties, and the development of the semiconductor industry will encounter an abundance of opportunities and challenges. Leveraging our reforms over the recent years, we have cultivated and retained more competent management, R&D, operations and support teams, accelerated innovation and development, successfully developed and utilized diversified technology platforms, prudently planned and expanded our production capacity, improved our operational efficiency and optimized our product mix. In order to better serve our customers and capture market opportunities, the Company initiates a new round of capital expenditure plans to further enhance the Company's core competitive edge and drive the Company's continuous growth.

We would like to again express our sincere gratitude to our shareholders, customers, suppliers and employees for their continued care and support of SMIC.

For the six months ended June 30, 2019, under IFRS, the Group applied the equity method on one-quarter-lag basis to account for its investments income or loss of certain associates (“investees”) because the report release date of the Group was earlier than the report release dates of investees and the financial statements of investees were not available on the report release date of the Group. The Group recognized the investment income or loss and other comprehensive income (“OCI”) and adjusted the cost of investment in associates based on its share of net profit or loss and OCI determined by prior quarter financial data of the investees. Under CAS, the investment income or loss and OCI should be recognized based on the financial data of investees in the accounting period of the investor, the Group.

For the six months ended June 30, 2020, given the financial information of the associates can be obtained in a timely manner, in the preparation of IFRS financial statements, the Group chose to recognize the investment income or loss and OCI based on accounting data of investees in the same accounting period as the Group’s to eliminate the accounting treatment difference between IFRS and CAS.

MANAGEMENT DISCUSSION AND ANALYSIS

GROSS PROFIT

Gross profit increased by 76.5% from US\$273.2 million for the corresponding period to US\$482.2 million for the reporting period, primarily due to the product-mix change and the increase in wafer shipments and the average selling price during this period.

PROFIT (LOSS) FOR THE PERIOD FROM OPERATIONS

Profit (loss) from operations increase from US\$18.4 million loss for the corresponding period to US\$112.0 million profit for the reporting period, primarily due to the combined effect of the changes of revenue, cost of sales and gross profit mentioned above, and the below following changes:

Research and development expenses was US\$324.5 million for the reporting period, compared to US\$332.5 million for the corresponding period.

General and administrative expenses increased from US\$107.7 million for the corresponding period to US\$133.6 million for the reporting period. The change was mainly due to the increased start-up cost relating to our effectively controlled Shanghai 12-inch fab before its entering into mass production in June 2020.

Other operating incomes were US\$99.7 million and US\$166.0 million for the reporting and corresponding periods, respectively. The decrease was mainly due to less government funding received (was) 10 times the reporting funding less gross.

TOTAL ASSETS

Total assets increased by 24.0% from US\$16,437.8 million at the end of last year to US\$20,388.2 million at the end of the reporting period, primarily due to 1) the increase in the purchase of property, plant equipment, 2) the increased trade and other receivables resulted from revenue increasing, 3) new capital receivable from non-controlling interests, 4) the increase in the payment of financial assets at amortized cost and 5) the net increase in cash and cash equivalent.

TOTAL EQUITY

Total equity increased by 29.2% from US\$10,197.9 million at the end of last year to US\$13,177.7 million at the end of the reporting period, primarily due to 1) the change in the assets and liabilities described above, 2) conversion options of convertible bonds and perpetual subordinated convertible securities exercised during the period and 3) capital contribution from non-controlling interest.

ASSETS PLEDGED AS SECURITY

Property, plant and equipment and land use right with carrying amount of approximately US\$121.8 million have been pledged to secure borrowings of the Group under mortgages. The Group is not allowed to pledge these assets as security for other borrowings or to sell them to other entities.

CAPITALIZED INTEREST

Interest incurred on borrowed funds used to construct plant and equipment during the active construction period is capitalized. The interest capitalized is determined by applying the borrowing interest rate to the average amount of accumulated capital expenditures for the assets under construction during the period. Capitalized interest is added to the cost of the underlying assets and is depreciated over as accounting policy. CAPITAL EXPENDITURES

The Group's planned 2020 capital expenditures are approximately US\$6.7 billion, mainly for the capacity expansion in equipment and machinery.

The Group's actual expenditures may differ from its planned expenditures for a variety of reasons, including changes in its business plan, market conditions, equipment prices, or customer requirements. The Group will monitor the global economy, the semiconductor industry, the demands of its customers, and its cash flow from operations and will adjust its capital expenditures plans approved by the Board as necessary.

The primary sources of capital resources and liquidity include cash generated from operations, bank borrowings and debt or equity issuances and other forms of financing. Future acquisitions, mergers, strategic investments, or other developments also may require additional financing. The amount of capital required to meet the Group's growth and development targets is difficult to predict in the highly cyclical and rapidly changing semiconductor industry.

EXCHANGE RATE AND INTEREST RATE RISKS

The Group's revenue, expense, and capital expenditures are primarily transacted in U.S. dollars. The Group also enters into

Cross currency swap contracts

To minimize the currency risk, the Group entered into cross currency swap contracts with a contract term fully matching the repayment schedule of the whole part of these RMB debts and repurchase schedule of the whole part of these RMB assets to protect against the adverse effect of exchange rate fluctuations arising from the RMB debts and assets. The following table details the cross currency swap contracts outstanding at the end of the reporting period:

Interest rate swap contracts

All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest expense occurred. The following table details the notional principal amounts and remaining terms of interest rate swap contracts outstanding at the end of the reporting period.

20. TRADE AND OTHER RECEIVABLES *(continued)*

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. Expected volatilities are based on the average volatility of the Company's stock prices with the time period commensurate with the expected term of the options. The dividend yield is based on the Group's intended future dividend plan.

The valuation of the options is based on the best estimates from the Group by taking into account a number of assumptions and is subject to limitation of the valuation model. Changes in variables and assumptions may affect the fair value of these options.

33. CONTINGENCY EVENTS

(1) PATENT LITIGATION WITH INNOVATIVE FOUNDRY TECHNOLOGIES LLC

On December 20, 2019, Innovative Foundry Technologies LLC (“IFT”) filed a patent lawsuit against the Company with the United States District Court for the Western District of Texas. On April 2, 2020, the Company’s related subsidiaries, as plaintiffs, voluntarily initiated a lawsuit for confirmation of non-infringement against IFT with the United States District Court for the Northern District of California, requesting the court to confirm that the Company’s related subsidiaries did not infringe the subject patents. On April 14, 2020, IFT re-filed its First Amended Complaint, adding the Company’s related subsidiaries as defendants. In addition, the related subsidiaries of the Company also filed a Petition for *Inter Partes* Review with the United States Patent and Trademark Office for the subject patents in litigation.

The management of the Group is of the view that the aforementioned plaintiff’s claim has no factual support. At this stage, the management of the Group believes that it is unlikely that the lawsuit would cause the outflow of economic benefits. As of June 30, 2020, the Group did not make provision for the contingent liabilities under the claim.

(2) ARBITRATION OF CONTRACT DISPUTES WITH PDF SOLUTIONS, INC.

On May 7, 2020, SMIC New Technology Research & Development (Shanghai) Corporation (“SMIC New Technology”), a subsidiary of the Company, received an arbitration notice issued by Hong Kong International Arbitration Center, whereby PDF SOLUTIONS, INC. (“PDF”) filed an arbitration request with Hong Kong International Arbitration Center. PDF considered that there are disputes on the rights and obligations of both parties under a series of agreements it entered into with SMIC New Technology, such as Professional Service Agreement and 14nm Project Agreement (“14nm Project-related Agreements”). PDF demanded SMIC New Technology to pay a fixed fee, incentive rewards and overdue payment in a total of approximately US\$20.72 million (accumulated up to April 30, 2020) under 14nm Project-related Agreements. In addition, PDF also demanded payment of subsequent variable fees, in accordance with the most lenient calculation standard that generates the highest fee amount, provided in the 14nm Project-related Agreements, and all arbitration expenses, including arbitrator’s fee and interest expenses. According to the applicable rules of Hong Kong International Arbitration Center, SMIC New Technology shall make a preliminary response within 30 days upon receiving the arbitration notice. As of June 5, 2020, SMIC New Technology has formally responded to Hong Kong International Arbitration Center and opined that the fees it owed to PDF had already been fully paid in accordance with the contractual obligations and no additional fee is required.

The management of the Group is of the view that the aforementioned contract dispute is still at an early stage and the result of arbitration is uncertain and cannot be reasonably ascertainable. As of the approval date of this report, the management of the Group believes that it is unlikely that this contractual dispute would cause the outflow of economic benefits. As of June 30, 2020, the Group did not make provision for the contingent liabilities from the contract dispute.
