NEWS RELEASE

SMIC Reports 2008 Second Quarter Results

*All currency figures stated in this report are in US Dollars unless stated otherwise.
The financial statement amounts in this report are determined in accordance with US GAAP.*

Shanghai, China – July 28, 2008. Semiconductor Manufacturing International Corporation (NYSE: SMI; SEHK: 981) (“SMIC” or the “Company”), one of the leading semiconductor foundries in the world, today announced its consolidated results of operations for the three months ended June 30, 2008.

Second Quarter 2008 Highlights:

- **Non-DRAM revenue increased by 3.8% QoQ to \$330.7 million from 1Q08 and increased by 24% YoY from 2Q07.**
- **Overall revenue, however, decreased to \$342.9 million in 2Q08, down 5.4% QoQ from 1Q08 and down 8.5% YoY from 2Q07 due to reduced DRAM shipments following the decision in 1Q08 to exit the commodity DRAM business.**
- **DRAM as a proportion of total revenue fell to 3.6% in 2Q08 from 12.1% in 1Q08.**
- **Logic sales from 0.13 micron full-flow and 90 nanometer technology nodes have increased by 14.5% in 2Q08 QoQ.**
- **Gross margin was 6.1% in 2Q08 compared to -9.0% in 1Q08**
- **Simplified ASP⁽¹⁾ increased by 6.9% QoQ to \$853 per wafer from \$798 in 1Q08**
- **The Company recorded a net loss of \$45.6 million in 2Q08 as we were still in the transitional stage of converting the DRAM capacity in our Beijing facility into logic production.**
- **Fully diluted EPS was (\$0.1227) per ADS.**

First Quarter 2008 Result Revision:

During the first quarter of 2008, the Company reached an agreement with our customers to exit the commodity DRAM business. The company considered this an indicator of impairment in regard to the long-lived assets of the Company’s Beijing facility in accordance with SFAS 144. The company has completed its analysis, and has recorded an impairment loss of \$105.8 million. The Q108 financials have been restated as shown on page 19 of this release.

Over a conference call, Dr. Richard Chang, Chief Executive Officer of SMIC, spoke with analysts about the quarterly results. “Overall, as expected, our revenue for the second quarter of 2008 declined slightly to \$342.9 million, but due to our gain in logic foundry services, we were able to significantly narrow our quarterly losses to \$45.6 million. The losses in the second quarter were primarily due to the fact that we are still transitioning from majority DRAM production to pure logic production in our Beijing facility.

The process of converting DRAM capacity into logic has been successful. Quite a number of new logic tape-outs with high yield are now in customer qualification, and a few have entered into production. Our total logic wafer shipments increased by 7.8% in the second quarter, and are expected to increase at least 30% in 2008, as compared to 2007. The ramp-up of our logic capacity

⁽¹⁾ Total Sales / Total wafer shipped

remains critical to our strategy, as it will better position us to match the market demand for our services.

In the second quarter, we witnessed rather strong customer demand, despite the severe macroeconomic situation in the U.S. The demand for our 8-inch fab service has been very strong consecutively every month for the second quarter. We foresee persistently increased customer demand throughout the remainder of 2008, particularly in communications and consumer applications, such as DTV, mobile TV, and wireless networking ICs, which comprise the major portion of our business. On a regional basis, revenue from North America remains solid, while revenue from the Asia Pacific region, including Mainland China and Taiwan, has seen the highest growth.

We are continuing our efforts in developing advanced technology nodes as more and more of our customers have migrated to finer line width technologies. Logic output for the 0.13um and 90nm technology nodes is expected to increase around 10% in the third quarter. We have also commenced our internal 65nm library and bit cell development, and our 45nm collaboration with IBM is proceeding smoothly in accordance to schedule.

We are pleased to see strong progress being made by our Chinese customers. As we continue to serve them with our 90nm technology process, we have also engaged them at the 65nm technology node. One customer announced that their new RFID product, which was manufactured in our factory, received EPC Global official authentication this month. This is the first Chinese-made RFID product to receive this international certification. Another customer started mass production of their 3G CMMB mobile TV chipset in the second quarter in our fab. The demand has been very strong extending to the rest of the year and beyond. Moving forward, we will continue to strengthen our local advantage in China by collaborating with these local fabless design houses.

We are also pleased with our profitable solar business and approved expansion plan. We will expand our solar capacity five to six times our current production output in the first half of 2009.

As we continue to execute our growth plans, we believe we will continue to create value for our customers worldwide and further enhance shareholder value for the coming years.”

Conference Call / Webcast Announcement

Date: July 29, 2008

Time: 8:30 a.m. Shanghai time

Dial-in numbers and pass code: U.S. 1-617-597-5342 or HK 852-3002-1672 (Pass code: SMIC).

A live webcast of the 2008 second quarter announcement will be available at <http://www.smics.com> under the “Investor Relations” section. An archived version of the webcast, along with an electronic copy of this news release will be available on the SMIC website for a period of 12 months following the webcast.

About SMIC

Semiconductor Manufacturing International Corporation (“SMIC”; NYSE: SMI; SEHK: 981) is one of the leading semiconductor foundries in the world and the largest and most advanced foundry in Mainland China, providing integrated circuit (IC) manufacturing service at 0.35 micron to 65 nanometer and finer line technologies. Headquartered in Shanghai, China, SMIC has a 300-millimeter wafer fabrication facility (fab) and three 200mm wafer fabs in its Shanghai mega-fab, two 300mm wafer fabs in its Beijing mega-fab, a 200mm wafer fab in Tianjin, a Shenzhen facility under construction, and an assembly and testing facility in Chengdu. SMIC also has customer service and marketing offices in the U.S., Europe, and Japan, and a representative office in Hong Kong. In

addition, SMIC manages and operates a 200mm wafer fab in Chengdu owned by Cension Semiconductor Manufacturing Corporation and a 300mm wafer fab in Wuhan owned by Wuhan Xinxin Semiconductor Manufacturing Corporation.

SMIC has filed with the U.S. Securities and Exchange Commission its annual report on Form 20-F for the year ended December 31, 2007. The annual report is available on our website at www.smics.com. In addition, all SMIC ADR holders have the ability, upon request, to receive a hard copy of our complete audited financial statements free of charge.

Safe Harbor Statements

(Under the Private Securities Litigation Reform Act of 1995)

This press release contains, in addition to historical information, "forward-looking statements" within the meaning of the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements, including statements concerning our expectation for third quarter 2008 revenue, our expectation that our performance will improve once we fully ramp up our logic production, our targeted increase in our total logic wafer shipments in 2008, our expectation for persistently strong market demand throughout the remainder of 2008, future anticipated collaborations with local fabless design houses, expected timing for beginning commercial production for our 65nm technology, SMIC's ability to grow and improve profitability in 2008, and statements under "Capex Summary" and "Third Quarter 2008 Guidance", are based on SMIC's current assumptions, expectations and projections about future events. SMIC uses words like "believe," "anticipate," "intend," "estimate," "expect," "project" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these words. These forward-looking statements are necessarily estimates reflecting the best judgment of SMIC's senior management and involve significant risks, both known and unknown, uncertainties and other factors that may cause SMIC's actual performance, financial condition or results of operations to be materially different from those suggested by the forward-looking statements including, among others, risks associated with cyclicity and market conditions in the semiconductor industry, intense competition, timely wafer acceptance by SMIC's customers, timely introduction of new technologies, SMIC's ability to ramp new products into volume, supply and demand for semiconductor foundry services, industry overcapacity, shortages in equipment, components and raw materials, orders or judgments from pending litigation, availability of manufacturing capacity and financial stability in end markets.

Investors should consider the information contained in SMIC's filings with the U.S. Securities and Exchange Commission (SEC), including its annual report on 20-F, filed with the SEC on June 27, 2008 especially in the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections, and such other documents that SMIC may file with the SEC or SEHK from time to time, including on Form 6-K. Other unknown or unpredictable factors also could have material adverse effects on SMIC's future results, performance or achievements. In light of these risks, uncertainties, assumptions and factors, the forward-looking events discussed in this press release may not occur. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date stated, or if no date is stated, as of the date of this press release. Except as required by law, SMIC undertakes no obligation and does not intend to update any forward-looking statement, whether as a result of new information, future events or otherwise.

Material Litigation

Recent TSMC Legal Developments:

On August 25, 2006, TSMC filed a lawsuit against the Company and certain subsidiaries (SMIC (Shanghai), SMIC (Beijing) and SMIC (Americas)) in the Superior Court of the State of California, County of Alameda for alleged breach of the Settlement Agreement, alleged breach of promissory notes and alleged trade secret misappropriation by the Company. TSMC seeks, among other things, damages, injunctive relief, attorneys' fees, and the acceleration of the remaining payments outstanding under the Settlement Agreement.

In the present litigation, TSMC alleges that the Company has incorporated TSMC trade secrets in the manufacture of the Company's 0.13 micron or smaller process products. TSMC further alleges that as a result of this claimed breach, TSMC's patent license is terminated and the covenant not to sue is no longer in effect with respect to the Company's larger process products.

The Company has vigorously denied all allegations of misappropriation. The Court has made no finding that TSMC's claims are valid, nor has it set a trial date.

On September 13, 2006, the Company announced that in addition to filing a response strongly denying the allegations of TSMC in the United States lawsuit, it filed on September 12, 2006, a cross-complaint against TSMC seeking, among other things, damages for TSMC's breach of contract and breach of implied covenant of good faith and fair dealing.

On November 16, 2006, the High Court in Beijing, the People's Republic of China, accepted the filing of a complaint by the Company and its wholly-owned subsidiaries, SMIC (Shanghai) and SMIC (Beijing), regarding the unfair competition arising from the breach of bona fide (i.e. integrity, good faith) principle and commercial defamation by TSMC ("PRC Complaint"). In the PRC Complaint, the Company is seeking, among other things, an injunction to stop TSMC's infringing acts, public apology from TSMC to the Company and compensation from TSMC to the Company, including profits gained by TSMC from their infringing acts.

TSMC filed with the California court in January 2007 a motion seeking to enjoin the PRC action. In February 2007, TSMC filed with the Beijing High Court a jurisdictional objection, challenging the competency of the Beijing High Court's jurisdiction over the PRC action.

In March 2007, 44575()-7.8975(s)23.5035(15t05.9259()-7.8983o)8.02983(33n323(o)8.02983(b)31.8547(j)-16.2487(e

promissory notes issued by the Company in connection with the Settlement Agreement. The Company opposed the application. A hearing was held on April 3, 2008. On June 24, 2008, the Court denied TSMC's application.

In May 2008, TSMC filed a motion in the California Court for summary adjudication against the Company on several of the Company's cross claims. The Company will oppose the motion. A hearing has been set on the motion for July 25, 2008.

A hearing was held on June 23, 2008, the Company filed with California court a cross-complaint against TSMC seeking, among other things, damages for TSMC's unlawful stealing of trade secrets from SMIC to improve its competitive position against SMIC.

Under the provisions of SFAS 144, the Company is required to make a determination as to whether or not this pending litigation represents an event that requires a further analysis of whether the patent license portfolio has been impaired. We believe that the lawsuit is at an early stage and we are still evaluating whether or not the litigation represents such an event. The Company expects further information to become available to us which will aid us in making a determination. The outcome of any impairment analysis performed under SFAS 144 might result in a material impact to our financial position and results of operations. Because the case is in its early stages, the Company is unable to evaluate the likelihood of an unfavorable outcome or to estimate the amount or range of potential loss.

Summary of Second Quarter 2008 Operating Results

Amounts in US\$ thousands, except for EPS and operating data

	2Q08	1Q08 ⁽³⁾	QoQ	2Q07	YoY

Capacity utilization	92.2%	92.1%		88.9%	

Note:

(1) Based on weighted average ordinary shares of 18,589 million (basic) and 18,589 million (diluted) in 2Q08, 18,579 million (basic) and 18,579 million (diluted) in 1Q08 and 18,476 million (basic) and 18,476 million (diluted) in 2Q07

(2) Including copper interconnects

(3) As Restated

- Non-DRAM revenue increased by 3.8% QoQ to \$330.7 million from 1Q08 and increased by 24% YoY from 2Q07.
- Overall revenue, however, decreased to \$342.9 million in 2Q08, down 5.4% QoQ from \$362.4 million in 1Q08 and down 8.5% YoY from \$374.8 million in 2Q07 due to lower DRAM shipments.
- Cost of sales decreased to \$322.1 million in 2Q08, down 18.4% QoQ from \$394.9 million in 1Q08 due to lower DRAM shipments
- Gross profit increased to \$20.8 million in 2Q08, up QoQ from \$(32.6) million in 1Q08 and down 45.9% YoY from \$38.5 million in 2Q07.
- Gross margins increased to 6.1% in 2Q08 from -9.0% in 1Q08 due to the company's gradual exit from the commodity DRAM business.

- Total operating expenses decreased to \$60.8 million in 2Q08 from \$64.4 million (excluding the asset impairment loss of \$105.8 million), a decrease of 5.6% QoQ, primarily due to a decrease in administrative expenses coupled with an increase in R&D expenses
- R&D expenses increased to \$37.7 million in 2Q08, up 10.1% from \$34.2 million primarily due to start up costs associated with the 12-inch project in Shanghai
- G&A expenses decreased to \$13.3 million in 2Q08 from \$18.6 million in 1Q08 due to an increase in foreign exchange gain, from a \$1.7M exchange loss in Q108 to a \$5M exchange gain in Q208
- Selling & marketing expenses decreased to \$4.4 million in 2Q08, down 10.8% QoQ from \$4.9 million in 1Q08 primarily due to a decrease in promotion costs associated with selling activities.

Capex Summary

- Capital expenditures for 2Q08 were \$231 million.
- Total planned capital expenditures for 2008 will be approximately \$700 million and will be adjusted based on market conditions.

Third Quarter 2008 Guidance

The following statements are forward looking statements which are based on current expectation and which involve risks and uncertainties, some of which are set forth under "Safe Harbor Statements" above.

- Revenues expected to increase 5% to 8%.
- Operating expense are expected to be in the high-teens.
- Capital expenditure expected to be approximately between \$230 to \$280 million.
- Depreciation and amortization expected to be approximately \$190 million to \$210 million.
