SEMICONDUCTOR MANUFACTURING INTERNATIONAL CORPORATION
SMIC Reports 2014 First Quarter Results

All currency figures stated in this report are in US Dollars unless stated otherwise.

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS").

Shanghai, China –April 28, 2014. Semiconductor Manufacturing International Corporation (NYSE: SMI; SEHK: 981) ("SMIC" or the "Company"), one of the leading semiconductor foundries in the world, today announced its consolidated results of operations for the three months ended March 31, 2014.

First Quarter 2014 Highlights

- Revenue was \$451.1 million in 1Q14, a decrease of 8.3% quarter over quarter.
- Non-GAAP revenue excluding wafer shipments from Wuhan Xinxin was \$451.1 million in 1Q14, a decrease of 6.7 % quarter over quarter.
- Gross margin was 21.3% in 1Q14, compared to 18.9% in 4Q13.
- Non-GAAP gross margin excluding wafer shipments from Wuhan Xinxin was 21.3% in 1Q14, compared to 19.2% in 4Q13.
- Profit for the period attributable to SMIC was \$20.3 million in 1Q14, compared to \$14.7 million in 4Q13.

Second Quarter 2014 Guidance

The following statements are forward looking statements which are based on current expectations and which involve risks and uncertainties, some of which are set forth under "Safe Harbor Statements" below.

- Revenue is expected to be up from 12% to 15% quarter over quarter.
- Gross margin is expected to range from 22% to 24%.
- Non-GAAP operating expenses excluding the effect of employee bonus accrual, funding of R&D contracts from the government and gain from the disposal of living quarters are expected to range from \$89 million to \$93 million.

Dr. Tzu-Yin Chiu, SMIC's Chief Executive Officer and Executive Director, commented, " We are excited to see that our overall profitability has improved despite hitting a seasonal trough in the first quarter, which is our eighth consecutive profitable quarter. When comparing Q1 2014 to Q4 2013, gross margin increased 2.4 percentage points, profit from operations more than tripled, and profit attributable to SMIC grew 38%; meanwhile, our capital structure also improved as our debt to equity ratio decreased 6.7 percentage points.

We are happy to announce that we received our first 28nm tape-out from one of our customers and we continue to target pilot production for 28nm by the end of 2014, and ramp-up and revenue generation in 2015.

When looking at our differentiated products, we have made good progress in fingerprint sensor technology and CMOS-MEMS technology, which are both now in production.

We are also excited to announce that we have secured some used equipment for our Shenzhen fab, and we target 10-thousand-wafers-per-month capacity installed in Shenzhen by the end of this year and production in 2015.

We have improved our profitability and, as is reflected in our guidance, we believe we are positioned for a recovery in the second quarter, and we continue to be optimistic about the second half of this year."

Conference Call Webcast Announcement

Date: April 29, 2014

Time: 8:30 a.m. Shanghai time

Dial-in numbers and pass code:

The call will be webcast live with audio at http://www.smics.com/eng/investors/ir_presentations.php or <http://www.media-server.com/m/p/n4r7ko87>.

An archived version of the webcast, along with an electronic copy of this news release will be available on the SMIC website for a period of 12 months following the webcast.

About MIC

Semiconductor Manufacturing International Corporation ("SMIC"; NYSE: SMI; SEHK: 981) is one of the leading semiconductor foundries in the world and the largest and most advanced foundry in mainland China. SMIC provides integrated circuit (IC) foundry and technology services at 0.35-micron to 28-nanometer. Headquartered in Shanghai, China, SMIC has a 300mm wafer fabrication facility (fab) and a 200mm mega-fab in Shanghai; a 300mm mega-fab in Beijing with a joint-venture 300mm fab that is currently under construction; a 200mm fab in Tianjin; and a 200mm fab project under development in Shenzhen. SMIC also has marketing and customer service offices in the U.S., Europe, Japan, and Taiwan, and a representative office in Hong Kong.

For more information, please visit www.smics.com.

Safe Harbor Statements

(Under the Private Securities Litigation Reform Act of 1995)

This press release contains, in addition to historical information, "forward-looking statements" within the meaning of the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements, including statements under "Second Quarter 2014 Guidance" and the statements regarding our targeted timing of pilot production, ramp-up and revenue generation for 28nm technology, our targeted 10-thousand-wafers-per-month capacity in Shenzhen and the timing of the instalment of such capacity, our expected recovery in the second quarter 2014 and our optimism about the second half of 2014 are based on SMIC's current assumptions, expectations and projections about future events. SMIC uses words like "believe," "anticipate," "intend," "estimate," "expect," "project," "target" and similar expressions to identify forward-looking

About Non Generally Accepted Accounting Principles Non GAAP Financial Measures

To supplement SMIC's consolidated financial results presented in accordance with IFRS, SMIC uses in this press release measures of operating results that are adjusted to exclude wafer shipments from Wuhan Xinxin Semiconductor Manufacturing Corporation ("Wuhan Xinxin"), which SMIC began gradually phasing out in 3Q13. There were no wafer shipments from Wuhan Xinxin from 1Q14 onwards. This earnings release includes non-GAAP revenue, non-GAAP cost of sales, non-GAAP gross margin and non-GAAP operating expenses, which consists of total operating expenses as adjusted to exclude the effect of employee bonus accrual, funding of R&D contracts from the government and gain from the disposal of living quarters. It also includes second quarter 2014 guidance for non-GAAP operating expenses. The presentation of non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS.

SMIC believes that use of these non-GAAP financial measures facilitates investors' and management's comparisons to SMIC's historical performance. The Company's management regularly uses these non-GAAP financial measures to understand, manage and evaluate the Company's business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-GAAP financial measure to its most directly comparable GAAP financial measure. A reconciliation of non-GAAP guidance measures to corres

Summary of First Quarter 2014 Operating Results

Amounts in thousands except for EP and operating data

	2014 Q1	2013 Q4	QoQ	2014 Q1	YoY

Diluted	0.03	0.02	-	0.06	-
Wafers shipped (in 8" equivalent wafers)	581,621	601,602	-3.3%	631,776	-7.9%
Capacity utilization	84.2%	87.4%	-	89.0%	-

Note

Based on weighted average ordinary shares of 2,000,000,000 on basic and 2,000,000,000 on diluted in 2014 Q1 and 2,000,000,000 on basic and 2,000,000,000 on diluted in 2013 Q4 and 2,000,000,000 on basic and 2,000,000,000 on diluted in 2014 Q1. Based on total equivalent wafers output divided by estimated total quarterly capacity.

- Revenue decreased to \$451.1 million in 1Q14, down 8.3% QoQ from \$491.8 million in 4Q13, mainly because 1) a decrease of wafer shipments in 1Q14, 2) no revenue from Brite Semiconductor Corporation and its subsidiaries ("Brite") as the Company deconsolidated Brite due to loss of control on December 30, 2013. From 1Q14 onwards, there were no wafer shipments from Wuhan Xinxin.
- Cost of sales decreased to \$355.0 million in 1Q14, down 11.0% QoQ from \$398.9 million in 4Q13, mainly due to lower wafer shipments and lower provision for customer claim in 1Q14.
- Gross profit was \$96.1 million in 1Q14, an increase of 3.4% QoQ from \$92.9 million in 4Q13.
- Gross margin was 21.3% in 1Q14, up from 18.9% in 4Q13 primarily due to the following reasons: 1) a product mix change, 2) lower provision for customer claim and 3) improvement in the fab efficiency. The aforementioned impact was partially offset by lower fab utilization in 1Q14.
- Operating expenses decreased to \$66.5 million in 1Q14, a decrease of 21.6% QoQ from \$84.8 million in 4Q13, mainly due to the reasons stated in Operating Expenses (Income) Analysis below.

Capex Summary

- Capital expenditures for 1Q14 were \$108.4 million.
- The planned 2014 capital expenditures for our foundry operations are raised to approximately \$1 billion from the previous \$880 million, of which the increase is for the acquisition of used equipment for our Shenzhen 8-inch fab. Out of the total capex of approximately \$1 billion, around \$570 million is for our new Beijing majority owned subsidiary, which is 55% funded by SMIC and 45% funded by the other shareholders of the subsidiary.
- In addition, as we stated last quarter, we also budgeted 2014 capital expenditures for non-foundry operations of approximately \$110 million mainly for the construction of living quarters. The Company plans to either rent out or sell these living quarter units to employees in the future.

Note

(1) SMIC defines non-GAAP revenue, non-GAAP cost of sales and non-GAAP gross margin, which are non-GAAP financial measures, as revenue, cost of sales and gross margin, in each case excluding wafer shipments from Wuhan Xinxin. SMIC also defines non-GAAP operating expenses prepared on a forward-looking basis as a non-GAAP

Semiconductor Manufacturing International Corporation
CONDENSED CONSOLIDATED STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME
(In US\$ thousands)

measure in our next quarter's guidance, which is adjusted to exclude the effect of employee bonus accrual, funding of R&D contracts from the government and gain from the disposal of living quarters. SMIC reviews non-GAAP financial measures together with revenue, cost of sales, gross margin and operating expenses to understand, manage and evaluate its business and make financial and operational decisions. The Company also believes it is useful supplemental information for investors and analysts to assess its operating performance without the effect of wafer shipments from Wuhan Xinxin, which were not output through its production capacity. SMIC announced in March 2013 that it had ceased to manage and operate the 300mm wafer fab in Wuhan owned by Wuhan Xinxin, and began gradually phasing out wafer shipments from Wuhan Xinxin in 3Q13. There were no wafer shipments from Wuhan Xinxin from 1Q14 onwards. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact our net profit for the period. In addition, because non-GAAP financial measures are not calculated in the same manner by all companies, they may not be comparable to other similar titled measures used by other companies. In light of the foregoing limitations, you should not
